Aishwarya Srivastava

aishwaryasrivastava@mail.com, (614) 815-0930

IMMIGRATION STATUS EDUCATION Indian citizen on F1 (Student) visa. Eligible for CPT/OPT. Will require sponsorship in the future.

Ohio State University, Columbus, OH

August 2014 - May 2018

B.S. Computer Science and Engineering (Minor in Mathematics)

(GPA 3.7/4.0)

- Listed on the College of Engineering's Dean's List for every semester completed.
- Awarded the College of Engineering Undergraduate Research Scholarship (December 2017)
- Certified CRLA Level 1 tutor (April 2017)

EXPERIENCE

Research Assistant

May 2017 - Present

Dr. Annika Peter, the Ohio State University, Department of Astronomy Developing methods for estimating the mass of dark matter halos in the $10^7 - 10^{10} M_{\odot}$ range. The project is funded by NASA and the NSF.

- Using Python's Matpollib.py and NumPy libraries to investigate over 4 million halos for empirical relationships between satellite kinematics and halo mass
- Using SQLite to integrate database querying with scripting to automate plot generation
- Learning the layout of new simulations and adapting existing software to extract data from them
- Studying academic papers to learn more about new techniques in astrophysics

Instructor June 2016 - August 2016

Girls Who Code Summer Immersion Program, Austin TX

Taught 20 high school girls the basics of computer science. The program was sponsored by Dell and the Barlovento Foundation.

- Assisted in lesson planning and delivery, assignments, equipment management, and logistics
- Addressed all questions and concerns to ensure a uniform understanding of the material
- Arranged and managed the classroom during field-trips, guest speakers, and breaks
- Communicated regularly with GWC staff regarding the progress of the program
- Maintained a safe and engaging classroom environment

SKILLS

Programming Languages: Python, C#, SQL, HTML, CSS

Tools: Git, Unity 3D, Visual Studio, Latex, Blender, Adobe Photoshop and Illustrator

Projects

KittenSeek

A 3D arcade video game made in Unity 3D and C#

- Programmed user input to the character motion and UI for an enhanced gaming experience
- Handled collision triggers and response between the character and the game environment
- Implemented two cameras that to offer multiple perspectives of the arena
- Added a particle system to mimic confetti with real-world physics mechanics
